PROJECTS

- Scientific Calculator :

As we know, the Calculator is a portable device used in our daily life to perform various mathematical functions such as addition, subtraction, multiplication, division, root, etc. However, we have scientific or sophisticated calculators used to solve complex tasks such as trigonometry functions, degrees, exponential operators, log functions, hyperbolic functions, square root, and so on. In this topic, we will create a calculator program in JavaScript.

- Language Used:- JavaScript, HTML,CSS.

- Library Management System Library management system:

C project on library management with options to Add books, List Books, List by title, Count books etc.. Program uses structure to store books records
